

OrangeHRM Login Module Manual Testing – Project Requirements

1. Project Overview

This project focuses on manual testing of the Login Module of the OrangeHRM Demo application. The purpose is to verify that the login functionality works correctly for both valid and invalid inputs and that appropriate validation messages are displayed.

2. Application Under Test (AUT)

- Application Name: OrangeHRM Demo
- URL: <https://opensource-demo.orangehrmlive.com>
- Username: Admin
- Password: admin123

3. Project Objective

To perform comprehensive manual testing of the Login Module and prepare professional QA documentation including test scenarios, test cases, bug reports, RTM, and test summary report.

4. Modules in Scope

- Username Field
- Password Field
- Login Button
- Forgot Password Link
- Validation Messages
- Password Masking
- UI Layout

5. Types of Testing

- Functional Testing
- Positive Testing
- Negative Testing

- UI Testing
- Regression Testing

6. Test Environment

- Operating System: Windows 10/11
- Browser: Google Chrome
- Testing Type: Manual Testing

7. Deliverables

- Project Requirements Document
- Test Scenarios
- Test Cases
- Bug Report
- Requirements Traceability Matrix (RTM)
- Test Summary Report
- Screenshots
- README.md
